STATEMENT OF EDUCATIONAL NEED

Pharmacists in Alabama must remain current on evolving statutes, rules, and collaborative practice regulations that directly impact their scope of practice and patient care responsibilities. Recent legislative changes, including updates to the Alabama Administrative Code Chapter 680, introduce new board structures, practice expectations, and collaborative practice parameters that require careful review. Without updates pharmacists may lack the knowledge necessary to ensure compliance, optimize patient safety, and fully leverage expanded practice opportunities. This activity addresses these critical updates to support pharmacist competence in navigating regulatory and practice change.
